---

SUMMARY

software developer with practical experience in JavaScript and React. Strong problem-solving skills, understanding of web fundamentals, and a keen interest in learning new technologies. Ready to contribute to development teams and real-world projects.

PROJECT- EXPERIENCE

Frontend Developer – Bridgeon / Personal Projects   JUN 2025 - Present

E-Commerce Project

- Designed and developed an e-commerce web application with product listing, cart, and checkout flow
- Built responsive UI using React, JavaScript, HTML, and CSS
- Implemented user authentication and basic order management
- Integrated APIs for dynamic product data

Face Detection System

- Developed a real-time face detection application using Python and OpenCV
- Implemented camera-based face recognition logic
- Focused on performance optimization and accuracy.

Netflix Clone

- Created a Netflix-style streaming UI using React
- Integrated movie data using TMDb API
- Implemented search, category-based browsing, and responsive layouts
- Applied component-based architecture and reusable UI patterns

---
